SOFTWARE ENGINEERING PROJECTS

Restaurant Reservation Application | Thinkful | [Link](#)   *08/2022*
- Full stack reservation and table management system.
- Implemented react router and express to build a RESTful API in order to make HTTP requests for all of the reservation data stored on the connected PostgreSQL database.
- Created CRUD functions and knex queries to handle data going to and coming from the database.
- Used Git to track changes and versions while keeping sensitive information from being pushed to repositories.

Technology: React, Node.js, Express, Knex and PostgreSQL.

Library Application | Thinkful | [Link](#)   *08/2022*
- Assembled the functionality for an application that allows users to search, review and check out books.
- Created search and sorting functions to allow users to know what books were available and their rating.
- Coded using JavaScript functions built to enable the expansion of the library with little need for code refactoring.

Technology: JavaScript ES6, Bootstrap, HTML5, Node.js

Study Tool Application | Thinkful | [Link](#)   *08/2022*
- Created an application that allows users to create, edit, and delete decks and cards within them.
- Created a REST API and middleware functions to allow user(s) to create, read, and edit a deck of study cards.
- Defined routes and URLs, and used state over multiple components.

Technology: JavaScript, React, Express, Knex, HTML and CSS. Progress/Versions tracked with Git.

Encryption/Decryption Application | Thinkful | [Link](#)
08/2022
- Built to be an encryption/decryption application to communicate and read top-secret messages.
- Created utilizing the test-driven development method.

Technology: JavaScript ES6, HTML5, Node.js, Bootstrap, Mocha, Chai.

Movie Database Application | Thinkful | [Link](#)   *08/2022*
- Assembled the back end of a movie website allowing any user to search for their favorite movies.
- Used CRUD methods for reviews, and view theaters and movies that are showing.
- Applied router and controller functions to retrieve a user's specific requests.

Technology: Node.js, Express, and Knex. Version control with Git.

PROFESSIONAL EXPERIENCE

Hudson Farmer and the Fish   Sleepy Hollow, NY
